PEPTIDES

VOLUME 3 1982

SUBJECT INDEX

Acetylation, 69
brain, rat
lesions, arcuate nucleus
α-MSH acetylating enzyme
pituitary gland
Acetylcholine, 663
β-endorphin
[D-Ala²]Met-enkephalin
lactation
morphine
naloxone
oxytocin release
suckling rats
Acquisition, 527
cigarette smoking
conditioned avoidance
extinction
human studies
vasopressin
ACTH
adrenalectomy, 143
adrenergic receptors, 815
affect, 411
atrial tissue, canine, 815
attention, 411
biosynthesis, 925
corticosterone levels, 143
CRF, 37, 143
cyclic AMP, 815
depression, 411
β-endorphin, 913
β-endorphin precursor, 925
GnRH, 55
hypophysectomy, 143
hypothalamus, 37, 143
immunohistochemistry, 913
LHRH, 55
mitochondria, 55
MSH, 411
α-MSH, 913
α-MSH precursor, 925
neuropeptides, 411
peptides, common precursor, 913
peptide hormones, 815
radioimmunoassay, 37
reptile pituitary, 913, 925
specific binding, 815
$ACTH_{4-10}$, 715
classical conditioning
MSH
nictitating membrane
rabbit
ACTH/MSH, 439
denervation
motor activity
nerve-muscle efficiency
nerve regeneration
neuromuscular development
stress
Adenylate cyclase, 897
heart, human
PHI
receptors
secretin
VIP
Adrenal atrophy, 989
corticotropin releasing factor antiserum
hypothalamic-pituitary-adrenal axis
rabbits
radioimmunoassay
Adrenal gland, 323
amphibians
LHRH
retina
sympathetic nervous system
Adrenal medulla, 469
blood pressure
dipeptidyl-carboxypeptidase inhibitor
enkephalin-like peptides
splanchnic nerve
Adrenalectomy, 143
ACTH
corticosterone levels
CRF
hypophysectomy
hypothalamus
Adrenergic nerves, 569
bovine pancreatic polypeptide
catecholamine
immunohistochemistry
Adrenergic receptors, 815
ACTH
atrial tissue, canine
cyclic AMP
peptide hormones
specific binding
Affect, 411
ACTH
attention
depression
MSH
neuropeptides
Aggressive behavior, 429
α-MSH
nucleus accumbens
preoptic lateralis
Aging, 775
fever
α-MSH
rabbits
thermoregulation
Aldosterone, 493
angiotensin
mineralocorticoids

renin
sodium appetite
Amino acids, 733
cholecystokinin
COOH-terminal peptides
in vivo synthesis
Amino acids, duodenal infusion, 129
cats
cholecystokinin
pancreas
secretin
vagal stimulation
Amino acid sequence
cholecystokinin, canine, 687
cholecystokinin, porcine, 687
gastrin, rat, 693
molecular heterogeneity, 687
oligonucleotide probe, 693
mRNA sequence, 693
Amphetamine, 729
biphasic effects
DSIP
locomotor behavior
d-Amphetamine, 105
chlorpromazine
dopaminergic system
drug interaction
β-endorphin
hypothermia
MIF-1
α-MSH
olfactory tubercle
striatum
Amphibians, 323
adrenal gland
LHRH
retina
sympathetic nervous system
Amunine (ovine CRF)
carp urophysis, 859
caudal neurosecretory system, 859
corticotropin-releasing factor, 995
fish, 859
immunohistochemistry, 995
neuropeptides, 859, 995
sauvagine, 859
urotensin I, 859
Amygdala, 283
image analysis
immunocytochemistry
peptidergic terminals
quantification
Amygdala, central nucleus, 273
immunocytochemistry
neurotensin
somatostatin
ultrastructure
vasoactive intestinal peptide
Analgesia
behavioral effects, 1039
brewer's yeast, 31
cardiovascular effects, 1039
β-casomorphin analogs, 793
catalepsy, 745
ceruletide, 555
cross-tolerance, 41
dermorphins, 745
double enkephalins, 697
dynorphin, 41
endogenous opiates, precursors and degradation, 1039
β-endorphin, 41
enkephalin binding, 869
Met-enkephalin, 31
guinea pig ileum, 697, 745
hormones, 1039
human studies, 955
hypothermia, 41
learning, 1039
lysine-vasopressin, 613
melatonin, 433
memory, 1039
metkephamid, 869
MIF-I, 433
morphine, 41, 433, 869
mouse vas deferens, 745
α-MSH, 433
multiple opiate receptors, 793
naloxone, 31, 433, 869, 955
neuropeptides, 1039
opiate-like peptides, 745
opiate receptors, 869
opioid peptides, 793, 869
pain, 613, 697
pentazocine, 955
receptors, 1039
sedation, 955
synthetic peptides, 745
thiorphan, 31
Anesthetics, 1023
blood pressure
cardiovascular system
circulatory shock
heart rate
opiate agonists
opiate receptors
respiration
Angiotensin
aldosterone, 493
diuresis, 495
drinking, 495
hypertonic saline, 495
lesions, AV3V, 495
medial preoptic area, 495
medial septum, 495
mineralocorticoids, 493
OVLT, 495
renin, 493
separation of functions, 495
SFO, 495
sodium appetite, 493
Angiotensin II
anteroventral third ventricle, 501
antidiuretic hormone, 501
drinking, 501
hypertension, 503
magnocellular neurons, 503
paraventricular nucleus, 501
subfornical organ, 501
supraoptic nucleus, 501, 503
urine osmolality, 501
vasopressin release, 503
Angiotensin II analogs, 631
angiotensin II antagonists
bombesin
drinking
eledoisin
pigeon
Angiotensin II antagonists, 631
angiotensin II analogs
bombesin
drinking
eledoisin
pigeon
Anolis melanophore, 13
α-MSH agonists
MSH analogs
Anteroventral third ventricle, 501
angiotensin II
antidiuretic hormone
drinking

paraventricular nucleus
subfornical organ
supraoptic nucleus
urine osmolality
Antibody cross-reactivity, 941
central nervous system
colchicine
dynorphin
immunocytochemistry
Antidepressants, 669
central nervous system
lithium
TRH receptors
Antidiuretic hormone, 501
angiotensin II
anteroventral third ventricle
drinking
paraventricular nucleus
subfornical organ
supraoptic nucleus
urine osmolality
Antiovulatory activity, 969
LH-RH antagonists
peptide synthesis
Antischizophrenics, 21
Met-enkephalin degradation inhibitors
Huntington's disease
narcotics
Anxiety, 627
attention
concept formation
desmopressin acetate
discrimination learning
human studies, males
memory
neuropeptides
vasopressin
Appetite
calcitonin, 17
central nervous system, 901
cholecystokinin, 535
diabetic (db/db) mice, 17
dynorphin, 901
eating, 17
exploratory behavior, 535
opioid peptides, 901
satiety, 535
sleep, 535
social behavior, 535
stress, 901
thermoregulation, 901
Arcuate nucleus, 655
cat
β-endorphin
hypothalamus
immunohistochemistry
α-MSH
neuropeptides
Arecoline, 319
β-endorphin release
human studies
physostigmine
prolactin release
Arginine vasopressin
autonomic nervous system, 515
corticotropin-releasing factor, 111
endocrine system, 515
in vitro studies, 111
neurohypophyseal peptides, 515
Associative learning, 881
aversive odors
Met-enkephalin
in utero studies
Atria rate, 475
enkephalins
norepinephrine
Atrial tissue, canine, 815
ACTH
adrenergic receptors
cyclic AMP
peptide hormones
specific binding
Atropine, 601
dogs
Met-enkephalin
gastric secretion
gastrin
pancreatic polypeptide
pancreatic secretion
vagus
Attention
ACTH, 411
affect, 411
anxiety, 627
brightness discrimination, 521
concept formation, 627
depression, 411
desmopressin acetate (DDAVP), 521, 627
discrimination learning, 521, 627
human studies, males, 627
memory, 526, 627
MSH, 411
neuropeptides, 411, 627
vasopressin, 627
Autonomic nervous system, 515
arginine vasopressin
endocrine system
neurohypophyseal peptides
Autoradiography
binding assay, 757, 765
central nervous system, 1073
dopaminergic pathways, 757
kidney, 765
neurotensin, 757, 765
substance P receptors
Aversive odors, 881
associative learning
Met-enkephalin
in utero studies

Baroregulation, 509
Brattleboro rats
catecholamines
hemorrhage
hypotension
renin-angiotensin
vasopressin
Behavioral effects, 1039
analgesia
cardiovascular effects
endogenous opiates, precursors and degradation
hormones
learning
memory
neuropeptides
receptors
Binding assay
autoradiography, 757, 765
dopaminergic pathways, 757
kidney, 757
neurotensin, 757, 765
Bioassay, 223
characterization of receptors
peptide research
Biogenic amines, 155
cholecystokinin octapeptide release
membrane depolarization
neurotransmitter uptake
perfusion of cortical synaptosomes

Biological activities, 137
gastrointestinal hormones
HPLC
motilin
secretin
solid-phase synthesis
Biosynthesis, 925
ACTH
β-endorphin precursor
α-MSH precursor
reptile pituitary
Biphasic effects, 729
amphetamine
DSIP
locomotor behavior
Blood-brain barrier
enkephalin receptors, 649
liquor-brain barrier, 299
median eminence, 299
morphine, cerebral uptake, 649
neuropeptides, 299
ORG-2766, 649
retrochiasmatic area, 299
Blood glucose, 163
eating
gut peptides
pancreatic glucagon
satiety
sham feeding
Blood pressure
adrenal medulla, 469
anesthetics, 1023
cardiovascular system, 1023, 1031
circulatory shock, 1023
dipeptidyl-carboxypeptidase inhibitor, 469
enkephalins, 1031
enkephalin-like peptides, 469
heart rate, 1023, 1031
neuropeptides, 1031
nucleus tractus solitarius, 1031
opiate agonists, 1023
opiate receptors, 1023, 1031
respiration, 1023, 1031
splanchnic nerve, 469
Body temperature, 739
chicks
cholecystokinin octapeptide
drinking
eating
satiety
Bombesin
angiotensin II analogs, 631
angiotensin II antagonists, 631
conditioned taste aversion, 61
drinking, 631
eating, 61
eledoisin, 631
lesions, hypothalamic, 61
meal size, 61
obesity, lesion-induced, 61
pigeon, 631
satiety, 61
Bombesin-like effects, 833
food and water deprivation
gastrin-releasing peptide
satiety
Bombesin-like peptides, neurochemistry, 559
bombesin-like peptides, pharmacology
endogenous peptides
HPLC
peptide receptors
Bombesin-like peptides, pharmacology, 559
bombesin-like peptides, neurochemistry
endogenous peptides
HPLC
peptide receptors
Bovine pancreatic polypeptide, 569
adrenergic nerves
catecholamine
immunohistochemistry
Bradykinin, 193
cyclic bradykinin
laser Raman spectroscopy
peptide conformation
Brain
amygdala, 149, 841, 1073
amygdala, central nucleus, 273
anterior commissure, 495
anterior thalamus, 21
anteroventral third ventricle (AV3V), 495, 501
arcuate nucleus, 69, 655
basal ganglia, 649
caudate nucleus, 21
caudate putamen, 941
central nucleus, amygdala, 283
cerebellum, 21, 69, 149
cerebral cortex, 21, 101, 941
cerebral ventricle, 963
cortex, 69, 83, 649, 901
dentate gyrus, 1073
frontal cerebral cortex, 149
globus pallidus, 21, 941
hippocampus, 69, 149, 649
hypothalamus, 31, 37, 69, 143, 149, 183, 311, 421, 565, 655, 781, 799, 837, 885, 901, 941
locus coeruleus, 249, 1073
medial preoptic area, 495
medial septum, 495
median eminence, 299, 305, 995
midbrain, 149, 841
nucleus accumbens, 429, 941
nucleus interfascicularis hypoglossi, 479
nucleus paraventricularis, 995
nucleus tractus solitarius, 479, 1031
olfactory bulb, 941, 1073
olfactory tubercle, 105, 539
organum vasculosum of the lamina terminalis (OVLT), 495
paraventricular nucleus, 421, 501
periaqueductal gray, 31, 941
pineal, 679, 805
pituitary, 69, 311, 353, 397, 405, 455, 531, 565, 913, 925
pons-medulla, 149
preoptic area, 841
preoptic lateralis, 429
raphe nuclei, 291
reticular formation, 941
retrochiasmatic area, 299
septal area, 21
spinal cord, 235, 249, 291, 545, 941
striatum, 31, 105, 149, 461, 539
subfornical organ (SFO), 495, 501
substantia nigra, 21, 941, 1073
superior colliculus, 1073
supraoptic nucleus, 501, 503
thalamus, 149, 841
vagus, 601
ventral hypothalamus, 841
ventral medulla, 479
ventromedial hypothalamus, 61
Brain insulin, 721
hypoglycemia
intracarotid administration
plasma glucose
Brain, monkey, 591
brain, rat
cyclo (His-Pro)
hypothyroidism
neurobiology
radioimmunoassay
TRH

Brain, rabbit, 125
electroencephalography
neuropeptides
Brain, rat
acetylation, 69
brain, monkey, 591
cyclo (His-Pro), 591
hypothyroidism, 591
lesions, arcuate nucleus, 69
α-MSH acetylating enzyme, 69
neurobiology, 591
pituitary gland, 69
radioimmunoassay, 591
TRH, 591
Brattleboro rats, 509
baroregulation
catecholamines
hemorrhage
hypotension
renin-angiotensin
vasopressin
Brewer's yeast, 31
analgesia
Met-enkephalin
naloxone
thiorphan
Brightness discrimination, 521
attention
DDAVP
discrimination learning
memory
Bronchodilation, 27
cats
5-hydroxytryptamine
substance P
vagus

Caerulein, 977
CCK-related peptides
crocodile
gastrin
Calcitonin
appetite, 17
diabetic (db/db) mice, 17
drinking, 749
eating, 17, 749
neuropeptides, 749
suppression of ingestive behavior, 749
Carboxypeptidase Y, 985
dehydro-enkephalins
enkephalin
enzyme stability
Cardiac ganglion, 485
cardiac muscle
catecholamines
horseshoe crab
neurohormones
proctolin
Cardiac muscle, 485
cardiac ganglion
catecholamines
horseshoe crab
neurohormones
proctolin
Cardiovascular effects, 1039
analgesia
behavioral effects
endogenous opiates, precursors and degradation
hormones
learning
memory
neuropeptides
receptors
Cardiovascular system
anesthetics, 1023
blood pressure, 1023, 1031
circulatory shock, 1023
enkephalins, 1031
heart rate, 1023, 1031
neuropeptides, 1031
nucleus tractus solitarius, 1031
opiate agonists, 1023
opiate receptors, 1023, 1031
respiration, 1023, 1031
Cardiovascular system, central control, 479
intermediolateral cell column
nucleus tractus solitarius
substance P
ventral medulla
viscerosensory afferents
Carp urophysis, 859
amunine (ovine CRF)
caudal neurosecretory system
fish
neuropeptides
sauvagine
urotensin I
β-Casomorphin analogs, 793
analgesia
multiple opiate receptors
opioid peptides
Cat
amino acids, 129
arcuate nucleus, 655
bronchodilation, 27
cholecystokinin, 129, 891
β-endorphin, 655
gastric acid secretion, 891
5-hydroxytryptamine, 27
